IDENTIFIERS \*North Carolina Statewide Testing Program

## ABSTRACT

The purpose of this report is to provide information about the level of student performance in the area of writing based on results for 1998-99 from the annual on-demand writing sample of the North Carolina Writing Assessment at grades 4, 7, and 10 (English II). It notes student performance increased at grades 4 and 7 when compared to student performance in 1997-98, although there was variation in student performance in writing among schools and school districts. The first part presents results of student performance in writing for grades 4 and 7, and presents state-level summary statistics, copies of the grades 4 and 7 sample student responses, grade 4 narrative and grade 7 expository composition focused holistic score scale, and regional assessment data by LEA (local education agency) performance. The second part presents results of grade 10 student performance, and presents state-level summary statistics, copies of sample student responses, an expository composition focused holistic score scale, a conventions analytical score scale, and regional assessment data by LEA performance. Contains 48 tables and 12 figures of data; appendixes contain student report forms for grades 4 and 7, and a list of charter schools. (RS)

## **Acknowledgments**

The development of a comprehensive Writing Assessment requires the skills and efforts of many individuals. We thank Daisy Vickers, Mary Wetherby, Jim Kroening, Karen Davis, Mildred Bazemore, and Stephen Blackwelder for the overall coordination of this project. We also thank Betty Marsh, Karen Eller, Andrea Barefoot, and Anthony Wells for the statistical analyses and verification of the test data, the production of many tables, charts, and graphs, and data entry and verification.

## Introduction

The 1998-99 Report of Student Performance in Writing provides information on student performance on the North Carolina Writing Assessment at grades 4, 7, and 10 (English II). The annual writing assessment, a component of the North Carolina Testing Program, is also a component of the ABCs Accountability Program at grades 4 and 7 (growth and performance composites) for the 1998-99 school year. Writing at grade 10 is also included in the ABCs Accountability Program beginning with the 1997-98 school year. The measurement of writing in North Carolina and its inclusion in the ABCs ensures that writing as a basic skill is emphasized in every classroom throughout each student's academic experience. Such an emphasis provides each student with a solid foundation in written communication in preparation for the competitive and global marketplace of the twenty-first century.

The writing assessment was first added to the North Carolina Testing Program in 1983-84 to place a greater emphasis on writing statewide. Initially, writing was measured in grades 6 and 9. In 1985-86, the writing assessment at grade 9 was moved to grade 8. English II, an end-of-course writing assessment that focuses on world literature other than literature from the United States and Great Britain, was added to the statewide testing program in 1991-92. In 1992-93, the annual assessment of writing was expanded again to include the measurement of narrative writing at grade 4. In response to the reorganization of public education in North Carolina and the ABCs, in 1995-96 the statewide testing program was reduced. The assessment of writing was reduced from grades 4, 6, 8, and 10 (English II) to grades 4 (narrative), 7 (descriptive or expository), and 10 (expository), the grades

in which writing was assessed in North Carolina during the 1998-99 school year.

The 1998-99 Report of Student Performance in Writing provides a longitudinal, comprehensive compendium of student achievement in North Carolina in the area of writing. The report was generated using aggregate student data from North Carolina public schools, including charter schools, and provides information regarding student performance at the state level at each of the score points for grades 4, 7, and 10. In addition, state-level performance is reported by the percentages of students scoring at or above 2.5 in grades 4 and 7 and at or above 3.0 in grade 10, by gender, ethnicity, and category of exceptionality. State-level results are also reported showing how well students are able to apply standard language conventions in their writing at grades 4 and 7 using +'s and -'s and in English II using an analytical score scale (1 – 3) in the areas of sentence formation, usage, mechanics, and spelling. Also included in the report are results by LEA (stem and leaf) and charts providing the percentages of students scoring at each of the score points, the percentages of students scoring at or above 2.5 for grades 4 and 7, and the percentages of students scoring at or above 3.0 for grade 10. The specific scoring rubrics and sample student essays representing each of the focused holistic score points are also included in this report.

The purpose of this report is to provide information about the level of student performance in the area of writing based on results from the annual on-demand writing sample of the North Carolina Writing Assessment at grades 4, 7, and 10 (English II).

## **Part I**

# **North Carolina Writing Assessment**

## **Grades 4 and 7**

## North Carolina 1998-99 Report of Student Performance in Writing Grades 4 and 7

### Overview

- The North Carolina Assessment of Writing was administered statewide on March 2, 1999 to all students in grades 4 and 7. The writing assessment at grade 4 measured students' composing skills in the narrative mode while the assessment at grade 7 measured the expository mode. Student essays at both grades were scored using a four-point scale.

### Findings

- Student performance in writing increased this year at grades 4 and 7 when compared to student performance in 1997-98. Although scores improved statewide at both grades, there was variation in student performance in writing among schools and school districts.
- At grade 4, approximately 55.2 percent of all students tested statewide achieved a score of 2.5 or greater (the standard) compared to 51.7 percent in 1997-98. At grade 4, the percent of students achieving 2.5 or greater increased by 3.5 percentage points. Overall, student performance in writing statewide at grade 4 has shown a substantial increase since the assessment began in 1992-93 (see Figure 1, page 13).
- At grade 7, approximately 70.3 percent of all students tested statewide achieved a score of 2.5 or greater (the standard) compared to 62.5 percent in 1997-98. At grade 7, the percent of students achieving 2.5 or greater increased by 7.8 percentage points. This is the fourth year of the writing assessment at grade 7, and this year's performance showed an increase over the three previous years (see Figure 2, page 13).
- Across both grades, higher percentages of female students than male students received the top writing scores.
- At grade 4, generally, a somewhat greater percentage of White students (61.2%) achieved a score of 2.5 or higher, followed by the percentage of Asian students (59.9%), Multi-racial students (54.7%), Other students (52.5%), American Indian students (50.6%), Hispanic students (46.8%), and Black students (43.2%).
- At grade 7, the proportion of Asian students (76.5%) receiving higher writing scores was slightly greater than the proportion of White students (76.1%). Multi-racial students (70.2%) had the next largest proportion receiving higher scores, followed by the proportions of American Indian students (62.8%), Other students (61.3%), Hispanic students (61.1%), and Black students (58.3%).
- While schools are diligently preparing students to meet more rigorous academic standards in reading, mathematics, and writing,

there are still disparities in performance among students, classrooms, and ethnic groups.

- Our continuing challenge is to emphasize and focus more on communication skills in the classroom. Whether oral, visual, or written, effective communication skills are the results of active learning and frequent use of higher level thinking skills. The State Board of Education has reaffirmed its belief that writing is a basic skill that must continue to be emphasized in every classroom by including the assessment of writing as a component of the ABCs accountability program.
- Table 1 on page 14 depicts percentages of students in the state scoring at or above the standard of 2.5 at grades 4 and 7 for the 1997, 1998, and 1999 school years. A disaggregation by ethnicity and gender is also provided.
- The annual writing assessment, a component of the North Carolina Testing Program, is a state-mandated assessment of student performance in writing at grades 4 and 7.
- The writing assessment was added to the North Carolina Testing Program in 1983-84 to place a greater emphasis on writing statewide. The revised North Carolina *Standard Course of Study (SCS)* emphasizes writing as a basic skill that can be improved with appropriate emphasis. The measurement of writing ensures that ample time and resources are allotted for its development in the classroom.
- The writing assessment measures students' skills in three different modes of writing. Students in grade 4 are asked to write a narrative composition (personal or imaginative), and students in grade 7 are asked to write either an expository (clarification or point-of-view) or descriptive composition.

### **What is the Writing Assessment?**

- On the day of testing the teacher removes from a sealed envelope individual copies of a writing prompt. At each grade the writing prompt provides instructions that set forth the task. Each student has fifty minutes to write a composition in response to the prompt. Scheduled extended time may be allotted to students with special needs and students with limited language proficiency, if appropriate.
- The prompt requires students to apply their knowledge and skills in language to demonstrate their ability to communicate information in writing. In response to the prompt, students in grade 4 must write a short story from something they have experienced, read, or imagined. At grade 7, students are required to write a composition to explain/clarify a situation/position or describe a place or object.
- Each year students' scored compositions, student and classroom scores, and scoring guides are returned to all fourth and seventh grade

### **How is the Writing Assessment administered?**

### **How are scores reported?**

teachers several weeks after scoring. Teachers are encouraged to use the scoring guides along with the student essays to acquire a better understanding of the scoring criteria and to interpret scores to students and parents.

- Each year summary scores are returned to each school and school system in the state.
- The expected standard for writing at grades 4 and 7 is the mid-point score of 2.5 or above on a four-point scale. This standard represents an achievable level and quality of writing that can be reached with effective instruction.
- By achieving a score of 2.5 or above, a student has demonstrated a reasonable command of the particular mode of writing assessed.
- The score of 2.5 is the current grade level standard that is also reported as the accountability indicator.
- Each student composition is scored by two independent readers. Each reader assigns either a 1, 2, 3, 4, or Non-Scorable. For essays where the two scores are discrepant by a single score point, a mid-point score is assigned to the student's composition. For example, a student may receive a 2.5 as a score.

There were 96,649 fourth grade public school student papers which were scored by two readers and rescored by the scoring director if the readers differed by more than one point on the four-point scale. The agreement rate of the readers is shown below in Table 2.

<u>Total Public School Papers</u>	<u>Fourth Grade Reader Agreement Status</u>		
	<u>Perfect Agreement</u>	<u>Adjacent Agreement</u>	<u>Resolution Required</u>
	<u>Percent</u>	<u>Percent</u>	<u>Percent</u>
96,649	72.8	27.1	less than 0.1

The 70 percent criterion rate for perfect agreement required by the State Board of Education was exceeded and the resolutions required were few.

There were 90,921 seventh grade public school student papers which were scored by two readers and rescored if the readers differed by more than one point on the four-point scale. The agreement rate of the readers is shown below in Table 3.

**Table 3**

<u>Total Public School Papers</u>	<b>Seventh Grade Reader Agreement Status</b>		
	<u>Perfect Agreement</u> <u>Percent</u>	<u>Adjacent Agreement</u> <u>Percent</u>	<u>Resolution Required</u> <u>Percent</u>
90,921	79.7	20.2	0.1

The 70 percent criterion rate for perfect agreement required by the State Board of Education was exceeded and the resolutions required were few.

- The assigned score point reflects each student's performance with respect to a set of predetermined criteria for each score point (focused holistic scoring). The score points define the student's command of the mode of writing required. A generic score scale follows that would go across modes and grades:
  - NS = Student response is not readable or composition is otherwise unscorable.
  - 1 = Student response exhibits a lack of command of the mode of writing.
  - 2 = Student response exhibits a weak command of the mode of writing.
  - 3 = Student response exhibits a reasonable command of the mode of writing.
  - 4 = Student response exhibits a strong command of the mode of writing.
- The quality of each composition is determined by considering the following characteristics: (1) main idea, (2) supportive details, (3) organization, and (4) coherence. A focused holistic score is assigned to each student's paper based on these characteristics.
- In general, responses that fall within the lower score-point range (1 and 2) of the score scale are those that, while they identified a main idea, failed to or just met the minimum criteria for supporting details. This is due to a loss of focus, listing of details, or a vagueness in word choice. In these cases, characteristics of organization and coherence are rarely a factor in determining a student's overall score. As a rule, only those students who elaborate such that they demonstrate facility in all or most of the four characteristics achieved higher score-point values (3 and 4).
- A second, independent score evaluates the student's performance with respect to the usage of standard English conventions (i.e., grammar, spelling, usage, and sentence formation). This score is reported as a "+" or "-". The "+" paper exhibits an acceptable level of skills in

sentence formation, usage, and mechanics; the “-” paper does not exhibit an acceptable level.

- Each year that a mode of writing is repeated, the same scoring criteria and score point scale or standards are used as were used in previous years. However, the scoring guides are tailored to fit a particular prompt and the anchor papers (i.e., papers used to exemplify score point standards) are selected to correspond to the prompt administered for a given year.
- Students in the fourth grade were asked to write a personal narrative composition in response to the following prompt:

*Think about a time when something happened that made you very happy. Write a story about what happened that made you very happy.*

- Readers scored 96,649 public school essays for grade four. The scores show that 55.2 percent of the fourth graders wrote well enough to score at or above the standard of 2.5. This represents an increase of 3.5 percentage points from the 51.7 percent who achieved this level in 1997-98. About 5.5 percent of the fourth graders received the highest scores of 3.5 and 4.0 in comparison to 4.1 percent last year, and 3.0 percent received the lowest scores of 1.0 and 1.5 compared to 5.8 percent in 1997-98. Less than one percent (0.1) of the papers had problems which made them non-scorable.
- For conventions, 35.6 percent of fourth-graders received a double-plus (+ +) rating in comparison to 68.7 percent in 1997-98, while 32.7 percent obtained a plus-minus rating (+ -) in comparison to 22.2 percent last year. About 31.7 percent were assigned a double-minus rating (− −). In 1997-98, 9.1 percent of fourth-graders received a double-minus rating.
- *Figures 3 and 4 on pages 15 and 16 depict the distribution of narrative composition scores for grade four across the years of administration (see also Table 4, page 17).*

### **Performance of Subgroups at Grade 4**

- **Gender.** Approximately 61.9 percent of the female students scored at or above the standard of 2.5 compared to 48.4 percent for male students.
- **Ethnicity.** About 61.2 percent of White students scored at or above 2.5 compared to 59.9 percent of the Asian students, 54.7 percent of Multi-racial students, 52.5 percent of Other students, 50.6 percent of American Indian students, 46.8 percent of Hispanic students, and 43.2 percent of Black students (see also Figure 5, page 18).

## Assessment Observations at Grade 4

- *Table 1 on page 14 shows the percentages of students at or above the standard of 2.5 for each subgroup.*
- *Table 5 on page 19 shows the percentages of students at each score point, by Exceptionality and Limited English Proficient.*
- At grade 4, scores increased compared to student performance in 1997-98. Students appeared to have little problem responding to the prompt and they wrote stories that were focused on a time when they were happy. However, one weakness in students' essays that prevented them from moving into the top score points was the same seen last year. The structure of the essays dominated the content. In other words, students spent a portion of their essays explaining to the reader how they were going to tell their stories, rather than actually telling them. The reader was cued throughout as to what the students were going to say, leaving little time for the action of the story. The issue is two-fold: the structure became the content and there was very little actual narrative or action. Three other problems seen in grade 4 essays were the listing of details instead of actual elaboration; failing to make elaboration relevant or linked to the action of the story; and lapsing into pure description. Where the description could be made relevant to the action of the story, credit was given, but in some instances the description was considered irrelevant information. Whether a narrative is personal or imaginative, the student must be aware of the need for a beginning, middle, and end and then focus on the story by offering relevant supporting details. A narrative is action, and it must progress.
- At grade 4, the language conventions scores dropped significantly when compared to the previous year. It appears that when the instructional focus is placed on the development and perfection of composing skills and the development and presentation of ideas, less emphasis is placed on the appropriate use of Standard English conventions (grammar, spelling, usage, and sentence formation). When this happens students tend to achieve higher focused holistic scores but lower convention scores. It appears that a greater emphasis needs to be placed on helping students to achieve a balance when deploying skills in the area of writing.

## Results of the Writing Assessment at Grade 7

- Seventh graders were asked to write a well-organized expository composition on the topic below.

*Think about your favorite day of the week. Name your favorite day of the week and explain why it is your favorite.*

- The 1998-99 school year is the fourth year that the writing test has been administered in grade seven. The readers scored 90,921 seventh-grade descriptive compositions. The scores showed that 70.3 percent

of the seventh graders wrote well enough to score at or above the 2.5 standard compared to 62.5 percent who scored at this level on a descriptive composition in 1997-98. About 8.6 percent of the seventh graders scored 4.0 and 3.5 while 10.7 percent of seventh graders obtained these scores in 1997-98. About 3.7 percent scored 1.0 or 1.5 this year, and 9.8 percent received these scores in 1997-98. Less than one percent of the papers had problems which made them non-scorable.

- About 77.5 percent of seventh graders were assigned a double-plus (+ +) for their use of standard English conventions, and 93.0 percent of the students received the same rating in 1997-98. The plus-minus rating (+ -) was assigned to 15.5 percent of the papers in comparison to 4.8 percent in 1997-98. Almost 7 percent were rated with the minus-minus (--) In 1997-98 about 2.2 percent of seventh grade students received the same rating.
- *Figures 6 and 7 on page 15 and 20 depict the distribution of grade 7 composition scores across the years of administration (see also Table 6, page 21).*
- **Gender.** Approximately 77.3 percent of the female students scored at or above the standard (2.5) compared to 63.6 percent of the males.
- **Ethnicity.** About 76.5 percent of the Asian students scored at or above the standard of 2.5 compared to 76.1 percent of the White students, 70.2 percent for Multi-racial students, 62.8 percent of the American Indian students, 61.3 percent of the Other students, 61.1 percent of the Hispanic students, and 58.3 percent of the Black students (see Figure 8, page 18).
- *Table 1 on page 14 shows the percentages of students at or above the standard of 2.5 for each subgroup.*
- *Table 5 on page 19 shows the percentages of students at each score point, by Exceptionality and Limited English Proficient.*

### **Performance of Subgroups at Grade 7**

### **Assessment Observations at Grade 7**

At grade 7, scores increased compared to student performance in 1997-98. Students did not appear to have problems responding to the prompt and were able to select a day of the week, provide clear, relevant reasons for their choice, and elaborate effectively as to why the day selected was their favorite day. However, one major problem observed in the essays was the breakdown of internal organization within the paragraphs. While the essays were externally organized by paragraphs and reasons, the progression often broke down within the paragraphs leading to some ideas appearing to be unrelated. This quality often caused essays to be scored a "3" rather than a "4." Also, repetition of the introductory and concluding paragraphs often contributed to a lower score.

**Assessment  
Observations at  
Grade 7  
(continued)**

- At grade 7, the language conventions scores dropped significantly when compared to the previous year. It appears that when the instructional focus is placed on the development and perfection of composing skills and the development and presentation of ideas, less emphasis is placed on the appropriate use of Standard English conventions (grammar, spelling, usage, and sentence formation). When this happens students tend to achieve higher focused holistic scores but lower convention scores. It appears that a greater emphasis needs to be placed on helping students to achieve a balance when deploying skills in the area of writing.

**State-Level Summary Statistics**

The following charts provide state-level summary statistics. The number tested at each grade level and the percentage of students scoring at each of the focused holistic score point values are provided. Longitudinal data of performance by gender and ethnicity, the performance of students with exceptionalities, and the performance of students identified as Limited English Proficient are also provided. The percent of students achieving the accountability standard of 2.5 is provided for all categories.

Notes:

- For 1996-97 through 1998-99 data, the Accountability Standard formula is the percent of students scoring at or above 2.5 (i.e., the sum of students scoring 2.5, 3.0, 3.5, and 4.0 divided by the total number tested).
- Due to rounding, some categories may not sum to 100%.
- Percent of students is based on the number of students in fourth grade. Percentages at grade seven are similar.

Notes: \*No scores are reported for groups with fewer than thirty students.

<sup>1</sup>Percent for "Not Exceptional" through "Other Exceptional Classifications" is based on the sum of the students in those categories. Percent for "Limited English Proficient" is based on the number tested in the "All Students" category.

The exceptional categories may not sum to "All Students" because some students did not indicate whether or not they were classified exceptional.

**1998-99**

**North Carolina**

**Writing Assessment**

**Grades 4 and 7**

**Copies of the Grades 4 and 7 Sample Student Responses**

The following pages provide copies of sample student responses from grades 4 and 7. The score point for each response and an annotation explaining the score are provided on each composition.

**Grade 4  
Narrative  
Composition  
Focused Holistic  
Score Scale**

**Score Point 4 - The response exhibits a strong command of narrative writing.** The response is focused and has an effective sequencing of events and a clear progression of ideas. The writer provides specific, relevant details to support ideas. The composition is unified and well elaborated. The writer's organization provides a clear strategy or controlled plan; the composition progresses logically and has a sense of overall completeness.

**Score Point 3 - The response exhibits a reasonable command of narrative writing.** The response is focused and establishes progression of ideas and events although minor lapses in focus and progression may be present. The composition contains elaboration and support in the form of specific details. The composition may have minor weaknesses in coherence. The writer's organization provides a reasonable sense of logical progression and overall completeness.

**Score Point 2 - The response exhibits a weak command of narrative writing.** The response exhibits some progression of ideas and events and provides some elaboration and support. The elaboration is relevant but may be flawed. The composition may not be evenly elaborated, having a list-like quality with concrete supporting details. The composition may have little connection between a controlling idea and supporting details relevant to development.

**Score Point 1 - The response exhibits a lack of command of narrative writing.** There is evidence that the writer has read the prompt and attempted to respond to it. The writer may attempt to support ideas, but there may be no sense of strategy or control, or the writer may exhibit skeletal control but the response is too sparse to be scored higher than a "1." The response may not sustain focus on the topic, may lack clarity, and/or may have an inappropriate strategy.

**NS** - This code may be used for compositions that are entirely illegible or otherwise unscorable: blank responses, responses written in a foreign language, restatement of the prompt, and responses that are off topic or incoherent. The Scoring Director must give permission for the use of "NS."

Write the final copy of your story here.

The thing that makes me happy is my Uncil. he spend alot of time with me. And sometime he take me to alot of places. He bring me stuff whenever he comes. He got me a dog once. And sometime we play basketball, baseball, football and play my niontdo. We like play Street Figher the best because we can beat each other.

Score Point 1:

The response exhibits a lack of command of narrative writing. The writer has seen the prompt and attempted to respond ("...thing that makes me happy is..."). However, the ideas and events are presented in random fashion with no narrative strategy. In addition, the response is too sparse to be scored higher than a "1."

Write the final copy of your story here.

On Friday the nineteenth at 7:00pm My Mom Came from Tennessee. She brought her dog Kayla with her. Kayla had goldish brown fur and brown eyes. Mom and I watched T.V till 12:00 at night. The next day I went outside and played with Kayla. When it was lunch time I had to go in. When I got in Kayla started to cry so my Mom had to go and give her food. Then after about 2 hours we ate dinner, we had Steak and macaroni. After that about 3 hours past and we had to go to bed. On Sunday my mom left at 4:00 AM and it was hard to say goodbye to her because I spent a whole weekend with her.

Score Point 2:

The response exhibits a weak command of narrative writing. The response exhibits some progression of ideas and events ("... The next day ... When I got in ... after about 2 hours ... After that ..."), but the events are presented in a list-like fashion. Supporting details are not always relevant and selective and do not contribute to the narrative strategy ("... goldish brown fur and brown eyes ... we had steak and macaroni").

Write the final copy of your story here.

One day I was looking through a magazine that is called Country Weekly. It is a magazine that tells about Country Music Stars. I saw Reba McEntire's Fan Club address! I told my Mama about it. I told her that I would like to enter the Fan Club. She said, "Since you love Reba so much well I guess you can." So one day we sent the money off which was 12 dollars so I could be a member of Reba's fan club. We could not send the money off on Sunday cause the mail don't come on Sundays. Every single day at 12:00 a.m. I would run to the mailbox and see if I got my stuff back from the fan club. But it was never out there. A week later I got it in the mail! I was so excited about it. When I opened the package I saw a bunch of stuff! The package contained a duographed picture of Reba, and it also included a membership certificate, a membership card, and a little book called 'The Reba Review'. When I saw all of this I was so, so happy I felt like doing a 100 back-flips. My Mom was so happy for me too. I just had to take all of this stuff to school and show this to my friends and my teachers. A couple days later I took it to school. I showed it to my friends they were not surprised because they new I loved Reba a lot. I showed it to my teacher Mrs. [unclear] and she liked it a lot. She told me to show it to her helper Mrs. [unclear]. Mrs. [unclear] thought it was very, very neat because her first name was also Reba. After lunch I showed it to Mrs. [unclear]. My Math teacher she said,

"You love Reba a lot don't you?" I said, "yes I do like her very much." When our reading teacher Mrs. \_\_\_\_\_ came in Mrs. \_\_\_\_\_ classroom I also showed it to her. I just had to show it to her because she also likes Reba McEntire. At 2:30 p.m. the bell rang for us to get out of school. On my way home I told my Mama, "Thank you for letting me enter the fan club." And I'll never forget that day when I opened the package from Reba McEntire's fan club.

Score Point 3:

This response exhibits a reasonable command of narrative writing. The response is focused on joining Reba McEntire's Fan Club and establishes a progression of events ("One day I was looking . . . So one day . . . When I opened the package . . . When I saw all of this . . . A couple of days later . . . After lunch . . . On my way home . . ."). The response has a clear and engaging beginning with a weak and rather list-like ending, nevertheless, giving it a reasonable sense of overall completeness. Supportive details are present and relevant to the main idea.

Write the final copy of your story here. So Happy!

One Christmas morning I awakened I was in my mom and dad's bed with them. I was just getting ready to get out of bed when my older sister, Sharon, came storming into the room. She had woken up before me so I thought she had gone downstairs. She was jumping up and down and looked really excited.

"What is it?" I asked her.

"You are so lucky!" she exclaimed.

"Why?" I said.

"Come downstairs with me," she told me.

I got out of bed. I went downstairs with her wondering what it was. We went into the den where our presents were. We both had a big stack of presents. I looked in my stack from Santa Claus. There, next to all of the other presents was a cage with a medium sized animal in it. It was a guinea pig! This is great! I thought. I bent down on my knees. It was a long white haired guinea pig.

A few minutes later my parents came down. I ran over to them.

"Mom, dad come look at what I got!" I said cheerfully.

They came into the den. I showed

them the guinea pig. I could see they were real happy. My parents said that I should think of a name for him. So I thought and thought but I couldn't think one. While I was thinking my mom made some breakfast. We ate our breakfast and then I thought of a name.

"Emery," I said, "Snowy will be his name."

They all thought it was a good name. So then we opened the rest of the presents and we ate some of our candy. This is the best Christmas ever, I thought. That was because I was "So Happy!"

Score Point 4:

The response exhibits a strong command of narrative writing. The response is focused on the Christmas present of the guinea pig with a logical sequencing of events ("One Christmas morning . . . I got out of bed . . . A few minutes later . . . While I was thinking . . . So then we opened the rest . . .") that is furthered by the effective use of dialogue. The composition is unified, controlled, and specific. Relevant details are used to support ideas.

**Grade 7  
Expository  
Composition  
Focused  
Holistic Score  
Scale**

**Score Point 4 - The response exhibits a strong command of expository writing.** The writer has focused on the subject matter and has provided specific, relevant reasons and details to support reasons as a means of elaboration. The writer's organization provides a clear strategy or controlled plan with a clear sense of logical progression and overall completeness. The composition is coherent.

**Score Point 3 - The response exhibits a reasonable command of expository writing.** The writer has focused on the subject matter and given reasons to support the main idea. Some responses contain a few well-elaborated reasons or more reasons with less elaboration. The writer's organization provides a reasonable sense of logical progression. The response is generally coherent and complete overall, although minor weaknesses are present.

**Score Point 2 - The response exhibits a weak command of expository writing.** The writer has focused on the subject matter and given at least one or two reasons or else a list of reasons with little or no elaboration. These responses may be poorly organized and may not establish a logical progression, but some sense of strategy exists. Some responses introduce reasons and ideas which are not explained or related to the subject matter, causing the reader to have to make inferences.

**Score Point 1 - The response exhibits a lack of command of expository writing.** There is evidence that the writer has seen and attempted to respond to the prompt. However, the response may not sustain focus on the topic. The writer may attempt to support ideas, but there may be no sense of strategy or control. Many responses exhibit skeletal control but may be too sparse to be scored higher than a "1."

**NS** - This code may be used for compositions that are entirely illegible or otherwise unscorable: blank responses, responses written in a foreign language, restatements of the prompt, and responses that are off topic or incoherent. The Scoring Director must give permission for the use of "NS."

Write the final copy of your paper here.

My favorite day of the week is Friday, because it's the last day of the week and it's closest the weekend. I like it cause children can stay out longer with their friends and don't have to worry about go to school the next day. There's stuff you can't do during the week some people can play their games or some can watch TV. On Friday's you can sleep over a friend or family's house.

On Friday you can go to the skating ring with friends or the movie, on other kids can stay up later and talk on the phone later then your usual times.

Score Point 1:

- The writer identifies a favorite day (Friday) and has given a few bare reasons with little or no elaboration. There is no sense of strategy or control.

Write the final copy of your paper here.

Friday is my favorite day because it is the last day of the week. Also we don't have to go to school the next day. Then I can over sleep and stay sleep all day. I don't hardly have home work on the weekend.

My next reason is that I get to spend my whole weekend in Kentwood. Also all my friends live in Kentwood and they even have a Taco Bell on the corner. Me and my friends play games all night or just ride our bikes all night.

My last reason is I get to stay up all night and do what ever, but usually I just watch T.V. and eat a lot of snacks. Then sometimes I just let my friends come in and we watch T.V. together.

Sometime I will go over one of their house. That's why my favorite day is Friday.

Score Point 2:

The writer identifies a favorite day of the week (Friday). The response provides a list of reasons with some elaboration for each. A sense of strategy exists, with a beginning, middle, and end to the paper. Various reasons are presented in separate paragraphs.

BEST COPY AVAILABLE

Write the final copy of your paper here.

Of all the days of the week, Saturday is my favorite. Supporting this, there is no school, I get to go on small trips and it is a day to have fun.

First of all, we have no school on Saturday. Us kids don't have homework and we don't have to worry about getting it in. We won't have to panic trying to find it. Another reason is that you don't have to get up early and hurry out the house. Instead of getting up at 5 AM during the week, I get up at 2 PM on Saturday. Finally, you don't have a bedtime. You can go to bed at anytime and look at late television shows.

Furthermore, our family usually go on small trips. I like them because you learn things. On our trip this past Saturday we learned that Fayetteville was near Smithfield so next weekend we are going to Fayetteville. Secondly, I explore and find out a little more about something I didn't know before. I also want to go on more and more!

My third and final reason is that it is a day to have fun. On Saturday, you can go out with friends. You could play with

them to the mall, skating ranch etc. Next, it is a day to relax, get things off your mind and release all your feelings. Therefore, you don't have any stress, that is also good for your health.

Overall, Saturday is a day to relax and feel good about yourself.

Score Point 3:

The writer identifies a favorite day of the week (Saturday). The response provides three well-established reasons ("... there is no school, I get to go on small trips and it is a day to have fun."). The writer's organization provides a reasonable sense of logical progression, with the three reasons established in the first paragraph and then elaborated on in the following paragraphs.

Write the final copy of your paper here.

Do you have a favorite day of the week? I know for sure that I do. For me, that one day that makes the whole week worth while is Saturday.

The best part about Saturday is that I don't have to go to school. Sure school can be fun, but by Friday, I just want a break from it. On Saturday, I don't have any homework assignments due the very next day. This means I can do other things than school work. The day also lacks something else; the stress of a school day. I don't have any schedule to keep or anywhere I have to be on Saturday. Those two things can cause a lot of stress at school that I don't have on a Saturday. Since there is no school, there is absolutely no school bus. What a relief, I don't get to freeze to death at the bus stop. No school, no homework, no stress, and no school bus just add to Saturday's fun.

Second, I get to sleep late. Usually, I get up at six o'clock in the morning, but on Saturday I can sleep as late as noon! That little alarm clock annoying scream can't get to me on Saturday either. Since I don't have to get up early, I'm not nearly as tired during the day on Saturday as I would be on a weekday. Saturday is the only day of the week where I get to sleep as late as I want, what a great day.

Last, on Saturday I will do things that I can't on the other days of the week. What kind of things? I like to work around the house on Saturday. One of my parents is always remodeling a room or doing yardwork. They always need my help and I'm always happy to help them. I also like to take my dog to the park on Saturday. We play fetch and frisbee there together. Both my dog and I have a great time at the park on those Saturdays spent at the park. I'll also go somewhere to hang out with my friends Ben, David and I will go to the mall or to a movie for a couple of hours then go over to one of our houses and play football or basketball. There are so many things I can do on Saturday that I can't on all the other days of the week.

Saturday is by far the best day in the week. You can't sleep late, not go to school, and hang out with your friends at any other time of the week; but on Saturday, you are free to relax and have a good time.

#### Score Point 4:

The writer identifies a favorite day of the week (Saturday). The response provides specific, relevant reasons ("... don't have to go to school. . . . get to sleep late. . . . do things that I can't on the other days . . .") and details to support reasons. The composition is coherent and complete within each paragraph and throughout the paper overall.

Notes: <sup>†</sup>The Accountability Standard formula is the sum of students scoring 2.5, 3.0, 3.5, and 4.0 divided by the total number tested.

\*Data not reported where Number Tested is fewer than five. The numbers have been rounded to the nearest tenth.

\*\*Data not reported where Number Tested is greater than 100. The numbers have been rounded to the nearest tenth.

Fair Remington numbers the charter school name has been abbreviated. The complete name can be found in the Appendix.

Notes: <sup>†</sup>The Accountability Standard formula is the sum of students scoring 2.5, 3.0, 3.5, and 4.0 divided by the total number tested. The numbers have been rounded to the nearest tenth.

\*Data not reported where Number Tested is fewer than five. The ethnic categories may not sum to All Students Number Tested because students may not have coded in an ethnic category.

\*\*Denotes a charter school. For reporting purposes the charter school name has been abbreviated. The complete name can be found in the Appendix.

## **Part II**

# **North Carolina Test of English II**

## **Grade 10**

**North Carolina  
1998-99 English II Report of Student Performance  
Grade 10**

**Overview**

- The English II Assessment of Writing, an end-of-course test, is a component of the North Carolina Statewide Testing Program. It is a state-mandated assessment of student performance in writing at grade 10 that focuses on World Literature other than British or American.
- The North Carolina Assessment of English II was administered statewide in Summer 1998, November 1998, March 1999, and April 1999. This is the eighth year the English II assessment has been given to all English II students. Student essays are scored on a six-point scale for content and a three-point, four-domain scale for conventions. A standard of 3.0 for English II (Level III or above) was adopted by the State Board of Education in September 1997. (Previous reports used a reference point of 3.5.)

**Findings**

- Student performance in English II increased this year when compared to student performance in 1997-98. Although scores improved statewide, there was variation in student performance in English II among schools and school districts.
- Statewide student performance in English II increased by 10.8 percentage points when compared to the previous year. In 1998-99 approximately 56.8 percent of all students who took the test achieved a score of 3.0 (the standard) or greater. In 1997-98, 46.0 percent of the students who took the test achieved a score of 3.0 or greater.
- Higher percentages of female students than male students received the top writing scores.
- Generally, a greater percentage of White students (65.2%) received higher English II scores followed by the percentage of Asian students (59.1%), Multi-racial students (55.5%), Other Students (54.9%), Hispanic students (47.3%), American Indian students (41.1%), and Black students (38.8%).
- While North Carolina schools continue to work diligently preparing students to meet more rigorous standards in the basic academic areas, in writing there are still disparities among students, classrooms, schools, and ethnic groups.
- Our continuing challenge is to emphasize and focus more on communication skills in the classroom. Whether oral, visual, or written, effective communication skills are the result of active learning and frequent use of higher level thinking skills. The State Board of Education has reaffirmed its belief that writing is a basic skill that must continue to be

emphasized in every classroom by including the assessment of writing as a component of the ABCs Accountability Program.

- Providing students with a solid educational foundation in writing and communication skills ensures that they are better prepared to become successful and competitive in the global marketplace of the twenty-first century.
- Table 1 on page 77 depicts percentages of students in the state scoring at or above the current accountability reference point of 3.0. A disaggregation by ethnicity and gender is also provided.
- The North Carolina Test of English II, a component of the North Carolina Statewide Testing Program, is a state-mandated assessment of student performance in writing at grade 10.

**What is the  
English II  
Essay  
Assessment?**

- The writing assessment was added to the North Carolina Testing Program in 1991-92 to place a greater emphasis on writing statewide. The revised North Carolina *Standard Course of Study* (SCS) emphasizes writing as a basic skill that can be improved with appropriate emphasis. The measurement of writing ensures that ample time and resources are allotted for the development of the writing process in the classroom.

**How is the  
English II  
Essay  
administered?**

- On the day of testing, the teacher removes from a sealed envelope individual copies of a writing prompt. The writing prompt provides instructions that set forth the task. Each student has 100 minutes to write a composition in response to the prompt. Scheduled extended time may be allotted to students with special needs, or students with limited language proficiency, if appropriate.

**How are scores  
reported?**

- Each year students' scored compositions, student and classroom scores, and scoring guides are returned to English II teachers several weeks after scoring. Teachers are encouraged to use the scoring guides along with the student essays to acquire a better understanding of the scoring criteria and to interpret scores for students and parents. Teachers receive a class roster with focused holistic scores as well as analytic scores for conventions for each student.
- Each year summary scores are returned to all schools and school systems in the state.

## How are the compositions scored?

- Each student composition is scored by two independent readers. The composition is assigned a 0 - 6 or Non-Scorable score by each reader. For an essay where the two scores are discrepant by a single score point, a mid-point score is assigned to the student's composition. For example, a student may receive 2.5, 3.5, 4.5, etc. as a score.

There were English II 81,563 public school student papers which were scored by two readers and re-scored by the scoring director if the readers differed by more than one point on the six-point scale. The agreement rate of the readers is shown below in Table 2.

**Table 2**  
**English II Reader Agreement Status Across Administrations**

<u>Total Public School Papers</u>	<u>Perfect Agreement Percent</u>	<u>Adjacent Agreement Percent</u>	<u>Resolution Required Percent</u>
81,563	73.7	25.9	0.4

The 65 percent criterion rate for perfect agreement required by the State Board of Education was exceeded and the resolutions required were few.

- The assigned score point reflects each student's performance with respect to a set of criteria for each score point (focused holistic scoring). The score points define the student's command of the mode of writing required. The quality of each composition, regardless of mode, is determined by considering the following characteristics: (1) main idea, (2) supportive details, (3) organization, and (4) coherence. A focused holistic score is assigned to each student's paper based on these characteristics.
- A second, independent evaluation assesses every student's performance in each of the following four areas of conventions: sentence formation, usage, mechanics, and spelling. An analytic score is assigned and reported for each of the four areas.
- Every year the same scoring criteria and score point scale or standards are used as were used in previous years. However, the scoring guides are tailored to fit a particular prompt and the anchor papers (i.e., papers used to exemplify score point standards) are selected to correspond to the prompt administered for a given year.

## Results of the English II Essay Test

- For the March English II Assessment, students were asked to write a well-organized composition in response to the following prompt:

*Many works of literature are organized around the theme of cultural change.*

*From the novels, short stories, full-length plays, poems, biographies, and autobiographies you have read, choose one work and explain how a character or a society reacts to cultural change, what the consequences are to the character or to the society, and the effect of the change on the overall work. The work you choose must be from world literature other than British literature (England, Ireland, Scotland, and Wales) and American (United States) literature. Give the title and, if you remember, the author of the work.*

- For the 1998-99 school year across all cycles, readers scored 81,563 public school essays for English II. The scores show that 56.8 percent of the students wrote well enough to score at or above 3.0. This represents an increase of 10.8 percentage points from the 46.0 percent who achieved this level in 1997-98. About 0.5 percent of the students received the highest scores of 5.5 and 6.0, which increased from last year, and 8.3 percent received the scores of 1.0 and 1.5 in comparison to 12.7 percent in 1997-98. Approximately 1.5 percent of the papers were blank, unreadable, or off-topic in comparison to 1.9 percent in 1997-98 (see Figure 1 and Figure 2, pages 78 and 79).
- The convention score is an analytic score reported in four areas: sentence formation, usage, mechanics, and spelling. The scale within each area is a 3 point scale with a score of 3 being a paper containing one or two errors in a particular area. In sentence formation, 43.3 percent scored a 3 while 12.5 percent were rated a score of 1. In usage, 8.2 percent of students earned a 3 while 45.0 percent received a 1. In mechanics, 25.0 percent had a score of 3; 18.4 percent had a score of 1. Also, 21.1 percent received a score of 3 in spelling, and 27.8 obtained a score of 1 (see Figure 3, page 80).

## Performance of subgroups

### Gender

- Approximately 63.3 percent of the female students scored at or above 3.0 compared to 50.4 percent for male students.

### Ethnicity

- About 65.2 percent of the White students scored at or above 3.0 compared to 59.1 percent for Asian students, 55.5 percent for Multi-racial students, 54.9 percent for Other students, 47.3 percent for Hispanic students, 41.1 percent for American Indian students, and 38.8 percent for Black students.

*Table 1 on page 77 shows the percentages of students at or above 3.0 for each subgroup (see also Figure 4, page 82).*

Table 3 on page 81 shows the percentages of students at each score point, by Exceptionality and Limited English Proficient.

## Assessment observations

- Students still appear to have difficulty with some level of literary analysis. However, there were fewer pure plot summaries this year and therefore fewer non-scorables and essays that were scored a "1." The prompts are always multi-leveled and the score scale requires all parts be addressed for a score of "5" or "6." Other problem areas were the relevancy and selectivity of supporting details. When students failed to select details carefully or to make them relevant to the main idea, the details often became summary. Students must select relevant details from the text in order to avoid summary and to make the details serve as elaboration. This year, students' elaboration showed more progression than in the past and was, therefore, relevant to the main idea.

**1998-99**

**North Carolina**

**English II**

**Writing Assessment**

**State-Level Summary Statistics**

The following charts provide state-level summary statistics. The number tested in English II, the percentage of students scoring at each of the focused holistic score point values, and the percentage of students scoring at or above 3.0 is provided for all categories of students. In addition, the percentage of students achieving the score points in sentence formation, usage, mechanics, and spelling are graphically depicted.

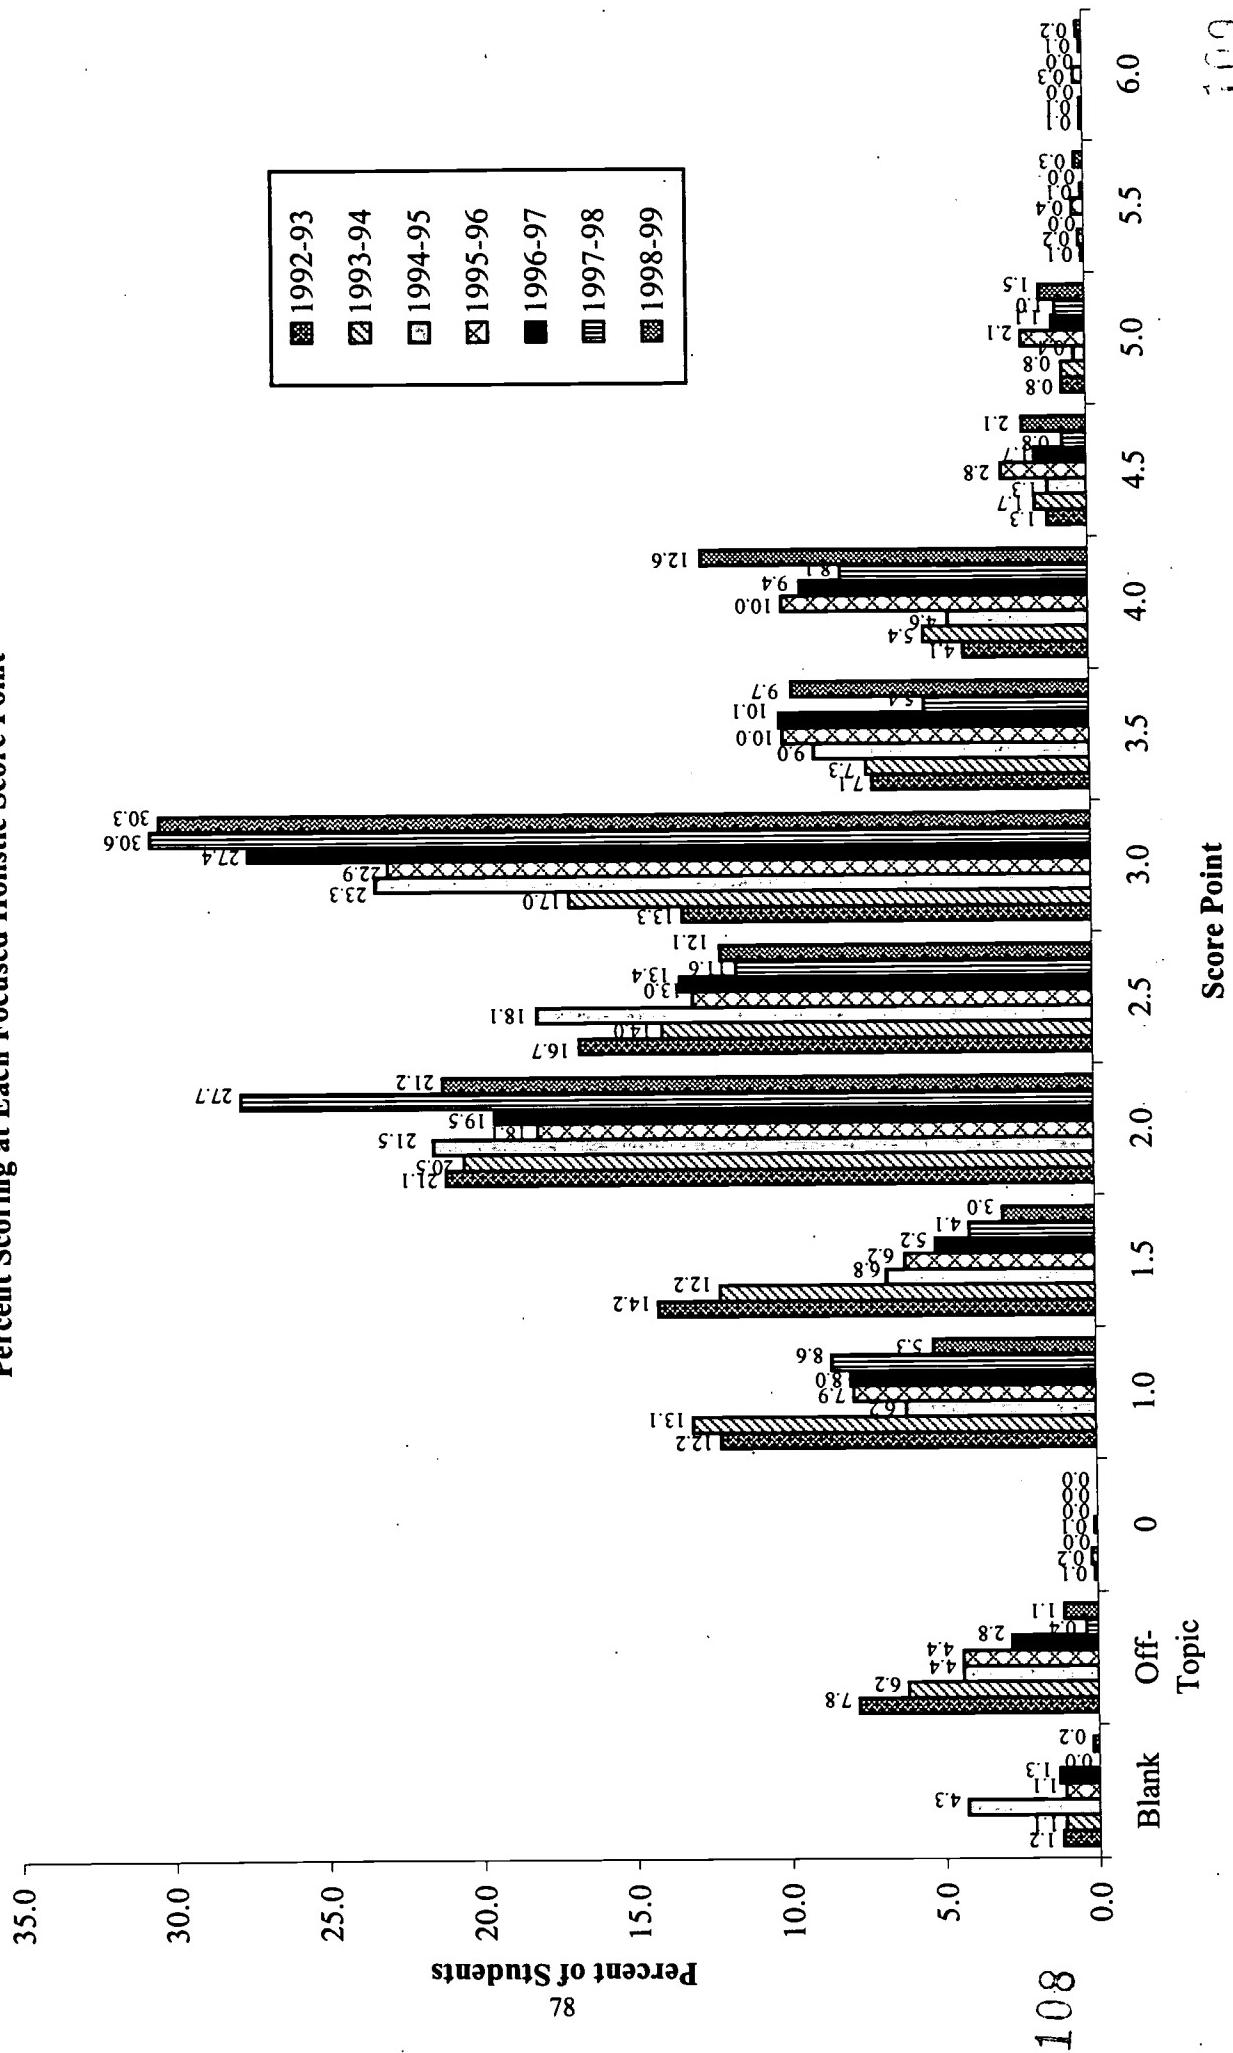

**Table 1. North Carolina Testing Program  
Annual English II Assessment, 1996-97 to 1998-99  
Percent of Students at or above the Standard of 3.0**

**Copies of the English II Sample Student Responses**

The following pages provide copies of sample student responses from English II. The score point for each response and an annotation explaining the score are provided on each composition.

**Expository  
Composition  
Focused Holistic  
Score Scale**

**Score Point 6** - The response exhibits a strong command of expository writing and an expository writing strategy. It is focused and has a fluent, clear progression of ideas and evenness of development. The writer clearly develops all parts of the prompt and uses an appropriate and highly effective approach (i.e., tone, point of view, originality). An appropriate sense of audience exists. Sentence structure is varied and effective, and word choice demonstrates the ability to use a wide vocabulary skillfully. If a literary work is referred to, the work must be from world literature (other than American or British literature). There is a sense of overall completeness.

**Score Point 5** - The response exhibits a strong command of expository writing. The writer uses specific details and clearly links events and relationships. A few minor flaws in coherence may be present. The writer addresses all aspects of the prompt and uses effective vocabulary and sentence structure. If a literary work is referred to, the work must be from world literature (other than American or British literature). An appropriate sense of audience exists. There is a sense of overall completeness.

**Score Point 4** - The response exhibits a command of expository writing, is focused and establishes progression of ideas and events although minor lapses in focus and progression may be present. Papers scored "4" have an organizational pattern, but minor flaws may exist or aspects of the prompt may be missing. If a literary work is referred to, the work must be from world literature (other than American or British literature).

**Score Point 3** - The response exhibits a reasonable command of expository writing. There is some progression of ideas and events and some elaboration and support. The elaboration may be flawed, but it has relevance to the requirements of the prompt. The papers are generally coherent. Although these papers are focused on the prompt, some may not address all aspects of the prompt.

**Score Point 2** - The response exhibits a weak command of expository writing. There is evidence that the writer has seen the prompt and responded to it, although the response may be unclear. Some responses may have little or no sense of connection between a controlling idea and supporting details relevant to development. Other responses may have a sense of focus but may lose it. The composition may be too sparse to be scored higher.

**Score Point 1** - The response exhibits a lack of command of expository writing. There is evidence that the writer has seen and attempted to respond to the prompt. However, the response may not sustain focus on the topic. There may be no sense of strategy or control, or they may be too sparse to be scored higher.

**Score Point 0** - The response addresses a literary work but is incorrect in its perception of the literary concept.

**Non-Scorable** - The response is off-topic, unreadable, or blank.

**Conventions  
Analytical Score  
Scale**

**Sentence Formation**

**Score Point 1:** Exhibits weak control of sentence formation. Contains several major errors and/or frequent minor errors.

**Score Point 2:** Exhibits marginal control of sentence formation. Contains one or two major errors and/or several minor errors.

**Score Point 3:** Exhibits strong control of all aspects of sentence formation with only an occasional minor error.

**Usage**

**Score Point 1:** Exhibits weak control of usage. Contains several major errors and/or frequent minor errors.

**Score Point 2:** Exhibits marginal control of usage. Contains one or two major errors and/or several minor errors.

**Score Point 3:** Exhibits strong control of all aspects of verb usage, pronoun usage, and other usage with only an occasional minor error.

**Mechanics**

**Score Point 1:** Exhibits weak control of mechanics. Contains several major errors and/or frequent minor errors.

**Score Point 2:** Exhibits marginal control of mechanics. Contains one or two major errors and/or several minor errors.

**Score Point 3:** Exhibits strong control of all aspects of mechanics with only an occasional minor error.

**Spelling**

**Score Point 1:** Exhibits weak control of spelling. Contains several major errors and/or frequent minor errors.

**Score Point 2:** Exhibits marginal control of spelling. Contains one or two major errors and/or several minor errors.

**Score Point 3:** Exhibits strong control of spelling with only an occasional error.

One of the novels I read and the cultural change. Some people fear Change and have difficulty adapting to it is "Things Fall Apart".

They cultural change when Okonkwo became the best Wrestler in the village by beating the undefeated The cat

"Things Fall Apart" has a huge amount of cultural like the week of Peace is when the village go the whole week without no fight or killing but Okonkwo disobey and beat his wife. Okonkwo believe in very hard work so he would not be like his father or his children wouldn't be like him. When Okonkwo went to war with the other village he cut off about 4 or 5 heads to bring back to his village to show his manness or fullness the heads was use and cleared to drink Palm Wine out of for victory.

Yams was a main dish for dinner in the village and some time that may be all

#### Score Point 1

The writer has selected *Things Fall Apart* and attempts to respond to the prompt. However, the response exhibits skeletal control and has little connection to the topic of cultural change.

Write the final copy of your composition here

In the novel *Night* written by Elie Wiesel, the characters in this story has been taken out of there home town to somewhere that they have never been before. The main character reaction to this change is calm but terrified.

When Elie arrives at the place where he's taken which is a concentration camp, things were just not the same. First, he was taken away from his mother and sister in which they never have seen each other again. He felt as though his life time dreams had been taken away from him.

The second reason that Elie had changed because he knew that him and his father would never get freedom again than they have had before. They were told by a minister to keep their faith and everything would work out in the end.

So then finally the Nazis came to an agreement that liberated the Jews forever because someone felt as though the harsh treatment that was given wasn't necessary. So after he became free he decided to write a book about it.

In this event to this story if you decide to keep your faith and hope everything would work out in the end.

Score Point 2

The writer has selected *Night*, and the response has some sense of focus on Elie and his reaction to cultural change. However, the response is sparse and consists of a list of details with little connection to the controlling idea.

Write the final copy of your composition here.

In Chinua Achebe's Things Fall Apart, Okonkwo the main character and his village of Umuofia go through a big cultural change. The theme of the story is when things change, Things Fall Apart. So you could probably see how the book, Things Fall Apart, is written and built around the theme of cultural changes.

At first Okonkwo the main character is a native with high village titles. The cultural change that he and his clan go through is when people from England along with missionaries come into Umuofia. They build churches and trading post. They then convert people from his clan into Christians then they bring in a government and change the lives of the native clan members. They don't let them do certain things anymore and every member of the clan is affected by it. The biggest effect is on Okonkwo the leader, he tries to take matter into his own hands and kill someone and then kill himself. That is how the cultural changes effects the village.

The consequences of the change that the clan goes through is that the white men are there now and everything they do they are harassed for. For example when an clan member that converted to Christianity kills a clan spirit the clan revolts and burns the Christian church down. Then the white men

Come after the clans members and arrest them. The other consequences of the cultural change are that they can't live there lives like they used to, because everytime they sacrifice something or do something like kill the twins in the evil forest they are effected because of the new culture brought in.

The effect of the change on the overall work is that when you go through or into a tribe, clan, or country. And change the way that they live and govern these people. Things will fall apart.

In conclusion the novel Things Fall Apart by Chinua Achebe, is built around the theme of cultural change, because "when things change, things fall apart."

### Score Point 3

The writer has selected *Things Fall Apart* and generally organizes the response around the prompt. The response is focused on the effect of change on Okonkwo and the village. There is some progression of ideas and some concrete supporting details.

Write the final copy of your composition here.

The theme of cultural change in the novel All Quiet on the Western Front by Erich Maria Remarque is dominant. In this action-filled war story, the main character Paul is taken away from his home, and his family to become a part of World War I. Paul experiences war for the first time, and he must learn to adapt to the cruel environment brought on by this horrifying event. Throughout the war there are many incidents that demonstrate the changes that occur in Paul due to the cultural change he must undergo. The reader can clearly see that Paul relies on comradeship to bring him through these tough situations. Also he must learn how to cope with the consequences of the war; and the death of companions, as well as the death of the officers.

In one particular scene Paul, and one of his close companions leave their campsite in search of food. As a team they work together to break into a goose house, kill a goose, and escape without being caught. Then they must build a fire, and cook the goose slowly for many hours before they can thoroughly enjoy the feast. Paul is not accustomed to the idea of working in order to be fed, and in order to handle this hardship, he relies on his friends. Once they have eaten well, they take the remainder of the food to another companion who is under closed arrest. Even a small incident such as this one shows the importance of comradeship during a war, and this is a must for surviving and coping in tough situations.

Among the other hardships that are a result of war is death. Of course the soldiers must learn how to face the death of their teammates and friends, but they must also learn to cope with

the lives the take away from the opposing army. Paul is faced with a situation such as this, when merely out of self defense he stabs a man from the enemy team who happens to be in a hole with him. Although he has shot, and killed the opponents many times already, this particular occurrence effects him quite differently. He must listen to the pain of the man as death falls slowly upon him, and he is forced to look into the eyes of the man who he now sees as a human being. This event causes Paul to break down emotionally, and it forces him to become a more hardened soul having to live with the terrible act <sup>that</sup> he committed.

The cultural change that occurs in this novel greatly impacts not only the character, but the overall effectiveness of the work itself. The change helps the reader to see the disastrous consequences of war, while creating a mood, and setting, that makes the action come alive for the reader. The newfound friendships; and the death of many humans...areways <sup>some of the</sup> in which Remarque portrays the events to appear realistic, and draw the attention of the reader.

#### Score Point 4

The writer has selected Remarque's *All Quiet on the Western Front* and uses specific details to support the idea that "Paul relies on comradeship to bring him through these tough situations." The response is focused and progresses logically.

Write the final copy of your composition here.

Many works of literature are built around the theme of cultural change. One work, in particular, that conveys this theme is the play A Doll's House. In the play, the character Torvald has a first-hand experience of the changing ideas and values in culture and reacts to these new ideas as most of the traditional society would — with disbelief and shock.

The author of the play portrayed Torvald as the embodiment of traditional values and society. His thoughts that a woman should stay home and raise the children represented a large majority of the cultural mindset of the time. Torvald treated his wife, Nora like a helpless child. He was forever calling her pet names such as "Songbird" or "Squirrel." He set restrictions and boundaries on her and forbade her to eat macaroons, her favorite sweets. All of this led to Nora's decision to leave him and this decision was representative of the changing times and culture. Upon Nora's decision, Torvald (as was the rest of the old society) was shocked and thought that she had gone mad. He thought "How will she care for herself?" and "What will people say?" Nora was breaking away from the ways of the past in which women were expected to be dependent on their husbands and she was becoming independent. This was mind-boggling to Torvald and the majority of society.

Consequently, the new cultural values of the time and the new light in which women were being seen, led

to Nora's change of view and realization. She left Torvald and her three children to build her own life and she no longer needed her father or husband to fulfill her needs. This cultural change and idea that women are independent brought on equality in the workplace and in the home.

The theme of women as independent <sup>also</sup> had a significant effect on the play itself. It made the work thought-provoking and added an element of shock and surprise. This made it much stronger and memorable to the audience.

In conclusion, the play A Doll's House used a theme of cultural change to strengthen the work and convey a message of the changing outlook on women and marriage. The character Torvald was representational of traditional values and old ways of thinking, whereas his wife, Nora acted on the new changing ideas of the culture; specifically that women are independent. This clashing of ideals brought Nora to leave Torvald and provided a strong and thought-provoking image to the work as a whole.

#### Score Point 5

The writer has selected *A Doll's House* and focuses on Torvald as the embodiment of traditional society and on Nora as the representation of the change in culture. The author provides specific details to support the theme of society's "changing outlook on women and marriage." The writer uses specific details and there is a sense of overall completeness.

Write the final copy of your composition here.

The theme of cultural change is prevalent in many novels. Cultural change affects the characters and plot of a novel by triggering a character to react, positively or negatively, molding the destiny of the character, and influencing the outcome of the overall work.

In Cry, the Beloved Country, by Alan Paton, Absalom Kumalo experiences a transition from one culture to another. He grows up in Ndotsheni, a small South African village that teaches moral values, obedience and respect to elders, and love and harmony between persons. When Absalom goes to Johannesburg, he faces a crucial cultural change, for Johannesburg is a heavily-populated, immoral city, full of crimes, poverty, and prejudice. Bewildered by the diverse ideas and people, Absalom joins his cousin and his gang of friends. Apartheid, unfelt in Ndotsheni, is prevalent in Johannesburg; there are separate bus sections for blacks and whites, and the blacks are discriminated from privileges and even from necessities. The shock of such cultural difference mixes Absalom - fearful; miserable; and unsure of himself.

The rough cultural change also makes Absalom forget his family, his values, and his scruples, he doesn't even write to his parents, unwilling and ashamed to keep the connection with his former culture. Pressured by his companions, he gives in to the dissolute culture of Johannesburg, and he robs, sleeps with a prostitute, and even kills. He leaves his pregnant girlfriend and rejects his second chance at the reform shore. The cultural change from Ndotsheni to Johannesburg transforms him into a dangerous person - dangerous because he is so unnerved by the different culture that he loses all self-confidence. An intimidated person's actions are unpredictable, and therefore, dangerous.

Absalom's malevolent reactions to the cultural change affect the plot and theme of the novel. Driven by fear, Absalom murders Arthur Jarvis.

which leads to James Jarvis' realization that he truly did not know his son or his work. After studying his son's essays, James Jarvis decides to continue Msimbi's work on behalf of the natives. Through his support, Ndetheni faces a renaissance in culture, land, and spirit. Because of Absalom's purposeful withdrawal from his family, his father, Stephen Kumalo, is forced to come to Johannesburg himself. Through this visit, Stephen Kumalo learns the mystery of life, the theme of the novel—that love is paramount to hatred, and that forgiveness covers sins. He learns that the secrets of love are what make life beautiful. The cultural change eventually leads to Absalom's death. However, it also instigates Stephen Kumalo's refection of love and incites Ndetheni's cultural and economic revival. It transforms the novel, *Cry, the Beloved Country*, from a tragedy about a young man's transient life to a book of hope. Cultural change affects real lives and people, as well as characters in novels, by causing personality change and influencing people's lives. In life, the culture determines the actions, and the cultural change triggers the reactions.

#### Score Point 6

The writer has selected *Cry, the Beloved Country* and clearly focuses on how cultural change led to the tragic downfall of one character but eventually led to the hope of a society. The response has a clear progression of ideas and events. The writer uses specific, relevant details and elaborates on them. The sentence structure is varied and effective.

Notes: \*The Accountability Standard formula is the sum of students scoring 3.0, 3.5, 4.0, 4.5, 5.0, 5.5, and 6.0 divided by the total number tested.

\*\*Data not reported where Number Tested is fewer than five. The numbers have been rounded to the nearest tenth.

\*\*Denotes a charter school. For reporting purposes the charter school name has been abbreviated. The complete name can be found in the Appendix.

Notes: † The Accountability Standard formula is the sum of students scoring 3.0, 3.5, 4.0, 4.5, 5.0, 5.5, and 6.0 divided by the total number tested. The numbers have been rounded to the nearest tenth.  
 \*Data not reported where Number Tested is fewer than five. The ethnic categories may not sum to All Students Number Tested because students may not have coded in an ethnic category.  
 \*\*Denotes a charter school. For reporting purposes the charter school name has been abbreviated. The complete name can be found in the Appendix.

155

Writing: Grades 4 and 7  
WRITING PARAGRAPHS

Learning to write is an important educational goal for all North Carolina students. Measuring the skills involved takes time and thoughtful judgment. Students were given approximately 50 minutes to write about a given topic. Each paper was scored by two carefully trained, experienced readers. The scores reported below represent their combined judgment of this sample of the student's writing. Proficiency for this assessment is a score of 2.5 or greater. Space is provided for this student's teacher to give additional information about other writing skills observed during the year.

The composition score shows how well this student expressed an idea without penalty for spelling or grammar. The second score is for English conventions and does represent a measure of this student's ability to use correct English.

### WRITING SKILLS MEASURED

#### SCORE

#### EXPLANATION

##### Composing Skills (Communicating an Idea)\*

- Having a main idea
- Providing supporting detail
- Showing organization
- Using coherence techniques

##### Conventions (Using Correct English)\*

- Using complete sentences
- Using appropriate forms of words
- Using standard mechanics (punctuation, capitalization)
- Using correct spelling

#### BEST COPY AVAILABLE

\* A FURTHER EXPLANATION OF THE TESTING AND SCORING MAY BE FOUND ON THE BACK OF THIS REPORT

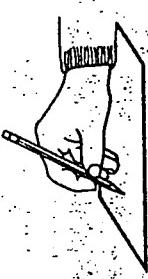

##### TEACHER COMMENTS:

I have reviewed this report and have made additional comments where necessary. Please do not hesitate to contact me for a more detailed explanation of the scores or further assistance in this matter.
